TEXTILE Laser Cutting Systems

Invest in your future.

www.eurolaser.com

For many companies, acquiring a laser system means entering into a whole new world of technology, one which opens up hitherto undreamed-of possibilities.

We will give you thorough advice in the preliminary stages and produce samples and process specimens to ensure exact compliance with your specific product requirements. Our employees are, of course, always ready with consistent support before and after the system is installed. The ready-to-plug-in systems offer the latest "sealed-off laser technology" with 60 to 600 Watt laserpower..

Our worldwide success is based on:

- Systems that are ready for connection and energy efficient
- Modular concept and units that are interchangeable
- Cost transparency achieved by individual service
- Worldwide service
- High conservation of value
- Software-independent
- Proved thousands of times moving system from the world

market leader **ZUN**
swiss cutting systems

Automatic material supply by feeding unit

A laser system - yes or no?

Whether or not a laser system is feasible for a company depends primarily on the question of its application. If the focus is on **flexibility** in combination with **high precision and quality of the cuts**, then the use of laser should certainly be considered. **Sample cuts** of the materials used, that can be provided by eurolaser at any time, mean that you can take your time comparing production times and quality.

Engraving of fleece

Fused edges - no seaming necessary

Advantages

- Fusion of the cutting edges, so no preliminary or reworking is required
- Precise and filigree cuts
- No tool wear
- No fabric distortion due to stress-free material feeding
- Automatic edge control with the roll-off system
- distortion-free unloading of the parts

Options:

- Automatic material feeding via a conveyor system
- Marking system e.g. for sewing lines
- Camera system with intelligent software for automatic cutting of printed textiles with adjustment calculation for the distortion
- Extension of the table surface and much, much more

Flexible applications

Laser cutting of printed materials by camera recognition

Advantages of the laser cutting of textiles

	Sealed edges (synthetics / natural)	Fine details	Accuracy	Flexibility	No fabric distortion	Drawing	Tool endurance	Multilayer

TEXTILE Laser Cutting Systems

Different system sizes suitable for your applications.

S-Line

800 mm / 31,5"

M-Line

1300 mm / 51,2"

L-Line

1800 mm / 70,9"

XL-Line

2200 mm / 86,6"

2XL-Line

2700 mm / 106,3"

3XL-Line

3200 mm / 126"

800 mm / 31,5"

1200 mm / 47,2"

1600 mm / 63"

2500 mm / 98,4"

800 mm / 31,5"

1200 mm / 47,2"

1600 mm / 63"

2500 mm / 98,4"

In addition to the static table designs, the marked systems are also available as conveyor systems with table extension and / or feeding unit.

Other exemplary applications of the „tools“ laser are the **cutting/engraving** from:

- Acrylics
- Wood, Veneer
- Plastic foils
- Compound material
- Cardboard
- Cork
- Dieboards

Send us your materials and samples!

In our Application Center your materials are subjected to customised tests, adjusted to fit specific client needs. Thus we make sure that you know best, how to process your material qualitatively and efficiently, using our system.

Cleaning Unit for Conveyor (open)

Laser Cutting System with table extension and feeding unit.

Table extension (enables cutting and unloading at the same time)

Conveyor Laser Cutting System (wire mesh belt for stress-free material feeding)

Feeding unit (automatic material feeding)

3000 mm / 118,1"
